Project 4: Twitter Bot

- Project Statement:
 - Malachi and I have agreed to make our Twitter Bot a fan account for musicians and producers. His name is Alan Cain (@Gargame55196808) and he is a music producer in Atlanta. He retweets based off hashtags, retweets based off of @mentions, likes (favorites) tweets, creates posts, and responds to posts. We wanted to create a realistic account that had both character and uniqueness. Online there are a lot of self-made artists and producers, so to “blend in” we went down this route. Our goal was to attract followers and to have people react/interact with Alan in any way.
